

## Who?

Susan McFarland-Lyons, Hackney

## What?

Hackney created a Buddy System to help vet and connect local school-age volunteers to support older people with getting online. Designed for those who have online access, but lack skills and/or confidence.

## Why?

Not everyone has family or friends who can support them in getting online. Blanket training doesn't meet everyone's individual needs.

## Reusable Tools

- Details of the buddies programme and lots of reusable templates and resources at: <https://sites.google.com/hackney.gov.uk/buddies>

## Tips

- Automate to keep overheads low
- Ensure all sides benefit - understand motivations
- Marketing is key: online, offline (e.g. bus stops)
- Helps to have strong relationships with schools & VCS
- Ensure all involved sign data protection policy

# Setting up a multi-generational buddy system

Susan McFarland-Lyons (Hackney)

Delivery Manager: Susan McFarland-Lyons

Administrator: Lynn Alex Humphrey

[digitalskills@hackney.gov.uk](mailto:digitalskills@hackney.gov.uk)

# Germ of this idea

- Googling 'buddies'
- Salford Foundation
- Pandemic > kindness of strangers
- Share, reuse and recycle
- Gave us a head start
- Didn't require a formal collaboration
- Didn't require a grant application

# Why you should set up a digital buddies scheme

- Digital isolation leads to social isolation at this time
- Not everyone has friends or family who can teach them
- People respond well to one-to-one tuition
- The experience itself can alleviate loneliness so a double bonus
- Young people and old people enjoy talking to each other!

But it seems like a big  
thing to set up!

You'd never  
have enough  
buddies to go  
round

It would take  
ages to teach  
people  
everything

People prefer  
face to face  
so it wouldn't  
work

Can be less  
intimidating  
over the phone

You do need  
to balance  
both sides

So don't. Teach  
them the one  
thing they really  
want to know

It would take a  
lot of  
administration

So reuse  
ours

The people with the  
skills to be buddies  
are at work and  
don't have time to  
volunteer

You can't  
market it if  
people aren't  
going out and  
aren't online.

Sounds  
expensive

School students  
are available and  
have the skills

Leverage  
VCSO  
partners and  
target f&f

Buddies  
are  
volunteers

How does it work?

## Buddy journey

*Administrator  
liaises with  
school*

*Buddy sees  
marketing at  
school*

*Buddy fills out  
online application  
form*

*Administrator  
checks references  
with teacher*

*Administrator  
trains buddy  
online*

## Beneficiary journey

*Administrator liaises  
with community  
groups*

*Beneficiary fills  
out online  
application form*

*Administrator calls  
beneficiary to  
discuss suitability*

*Administrator  
matches beneficiary  
to buddy*

## Buddy journey

*Administrator  
arranges call  
between buddy  
and beneficiary*

*Buddy teaches  
beneficiary over  
the phone*

*Administrator  
checks in with  
buddy*

*Administrator  
matches another  
buddy*

## Beneficiary journey

*Administrator  
checks in with  
beneficiary*

*Beneficiary  
completes  
evaluation*

*Beneficiary  
leaves or goes  
on waiting list*

Things worth knowing

# Things worth knowing I

- For scalability - volunteer-based, automate as much as possible to keep low overheads, redeployed staff to trial
- As with any volunteer programme, need to make it clear to all sides what they are getting out of it - administrator, buddies, beneficiaries, schools
- Take time to understand the motivations of older people (our key, but not only, demographic)
- We can't help everyone directly but we don't want to disappoint so signpost others ([Digital skills](#), [AbilityNet](#))

# Things worth knowing II

- Marketing is key - include offline, create engaging videos, standardise copy so it's ready to go, and repeat
- Helps if the administrator already has relationships with schools
- Leverage Council partnerships with the voluntary sector to find beneficiaries eg lunch clubs, care home staff
- Balancing act between numbers of buddies and beneficiaries
- We're also utilising ICT Support Apprentices as part of their training

# Resources you can reuse

[View resources on Digital Buddies website](#) or on [LOTI website](#)

- Be a buddy form
- Request a buddy form
- Training guides
- Evaluation forms
- Case study templates
- Administration sheet
- Safeguarding agreement and risk assessment
